Ms. Elinor G. Adensam, Director  
BWR Project Directorate No. 3  
U.S. Nuclear Regulatory Commission  
7920 Norfolk Avenue  
Washington, DC 20555

Dear Ms. Adensam:

Re: Nine Mile Point Unit 2  
Docket No. 50-410

Niagara Mohawk Power Corporation is requesting a change to Technical Specification Surveillance 4.6.6.1.b.1. The requested change, as well as justification, is attached. Niagara Mohawk Power Corporation is requesting that the attached change be incorporated into the full power license when it is issued. This Technical Specification change is an operational enhancement.

Very truly yours,

*C. V. Mangan*  
C. V. Mangan  
Senior Vice President

1. The first part of the document  
 discusses the general principles  
 of the project and the  
 objectives of the study.  
 2. The second part of the document  
 describes the methodology used  
 in the study and the data  
 collection process.  
 3. The third part of the document  
 presents the results of the study  
 and discusses the implications  
 of the findings.

The results of the study  
 indicate that there is a  
 significant correlation  
 between the variables  
 studied.

Subject: Change to Drywell and Suppression Chamber Hydrogen Recombiner Systems Technical Specification Surveillance 4.6.6.1.b.1

The requested changes are attached. The changes are being requested in order to reduce the hardship involved in performing a channel calibration associated with thermocouples located inside the hydrogen recombiner. Our Instrumentation and Controls Group at the Nine Mile Point Unit 2 Site has indicated that in order to access some of the thermocouples, it is necessary to dismantle the shell of the Recombiner. Niagara Mohawk proposes a qualifying footnote to Surveillance 4.6.6.1.b.1 on page 3/4 6-46 of the Technical Specifications. When the recombiner is tested in accordance with Surveillance 4.6.6.1.a, a thermocouple response or comparison of thermocouple responses shall be performed. Similar relief has been granted for thermocouples in the Isolation Actuation, Remote Shutdown, and Accident Monitoring Instrumentation Tables in Nine Mile Point Unit 2 Technical Specifications.
