Re: Nine Mile Point Unit 2
Docket No. 50-410

Gentlemen:

In our letter dated December 5, 1986 (NMP2L 0945), Niagara Mohawk stated that the results of the asphalt based volume reduction and solidification system preoperational test would be submitted by January 15, 1987.

Preoperational testing of the above Radwaste system is in its final stages. The approved results will be submitted to the Nuclear Regulatory Commission by February 2, 1987. The volume reduction and solidification system will be declared operational thirty (30) days (March 4, 1987) after submittal of the preoperational test results. The system will be available for use at that time unless further comment is received by your staff.

Very truly yours,

C. V. Mangan
Senior Vice President
