Re: Nine Mile Point Unit 2
Docket No. 50-410

Gentlemen:

Niagara Mohawk Power Corporation submitted six proposed Technical Specification changes to the Nuclear Regulatory Commission during the month of December 1986. In our letter dated December 18, 1986, NMP2L 0962, we stated the issuance of the Full Power License for Nine Mile Point Unit 2 should not be held up to incorporate these changes. In the attachment to that letter was a list of the six Technical Specification letters. If that attachment is considered outside the context of the transmittal letter, it could be construed as a request to withdraw the change requests. Please find attached to this submittal a revised list of the submitted letters entitled, "Technical Specification changes not impacting Full Power License." This supersedes the attachment to our December 18, 1986 submittal and clarifies the intent of the attachment.

Very truly yours,

C. V. Mangan
Senior Vice President
