Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

In Inspection Report No. 50-220/86-13 a request was made of Niagara Mohawk to advise you in writing of actions to expedite the validation process of Vendor Technical Manuals. Niagara Mohawk is committing additional personnel from Nuclear Design Engineering to supplement our contractor and site staffs to expedite the review and approval of the Vendor Technical Manual process. By having Nuclear Design Engineering personnel involved in the initial review, the review process can be consolidated and several handling steps eliminated for many manuals. Based upon the current planning, it is expected that the existing schedule can be reduced by approximately one year. Therefore, the target completion date for this program will be mid-1988. Please be advised that the target date is based on preliminary estimates. The Commission will be informed if future scheduling of this program indicates a completion date later than mid-1988.

In Niagara Mohawk's response to Generic Letter 83-28, dated November 8, 1983, Niagara Mohawk made a commitment to initiate a program for the administrative control of Vendor Technical Manuals. In addition, a program for the periodic audit of the controlled copies of the Vendor Technical Manuals was to be developed, with the first audit to be completed by May 1, 1984. These items were completed as committed to in response to Generic Letter 83-28.

Sincerely,

NIAGARA MOHAWK POWER CORPORATION
