Docket No. 50-220

APPLICATION FOR AMENDMENT  
TO  
OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. DPR-63, hereby requests that Sections 2.1.1, 3.6.2 and 4.6.2 of the Technical Specifications set forth in Appendix A to that License be amended. These proposed changes have been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed Technical Specification changes are set forth in Attachment A to this application. Section 2.1.1 has been proposed for amendment to provide clarification that operation above 100% core flow is not permitted. Sections 3.6.2 and 4.6.2 have been proposed for amendment to include the mechanical stops and electrical limiters which enforce compliance with the 100% core flow limit. The proposed changes would not authorize any change in the type of effluents or in the authorized power level of the facility in conjunction with this application for License Amendment. Supporting information and analysis, which demonstrate that the proposed changes involve no significant hazards considerations pursuant to 10CFR50.92 are included as Attachment B.
