Docket No. 50-410

APPLICATION FOR AMENDMENT

TO

OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. NPF-69, hereby requests that Section 3/4.7.1 of the Technical Specifications set forth in Appendix A to that License be amended. This proposed change has been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed changes to the Technical Specifications are set forth in Attachment A to this application. Section 3/4.7.1 has been proposed for amendment in order to reflect an increase in the service water supply header discharge water temperature for operation and shutdown conditions. The proposed changes would not authorize any change in the types of effluents or in the authorized power level of the facility. Supporting information and analyses which demonstrate that the proposed changes involve no significant hazards consideration pursuant to 10CFR50.92, are included as Attachment B.

Attachment C to this Application demonstrates that the criteria contained in 10 CFR 10.91(a)(5) for issuance of the license amendment without prior notice and opportunity for a hearing or for public comment are met. Attachment D discusses the environmental impacts associated with the change and concludes that pursuant to 10 CFR 51.22, no environmental impact statement or environmental assessment need be prepared.

WHEREFORE, Applicant respectfully requests that Appendix A to Facility Operating License No. NPF-69 be amended in the form attached hereto as Attachment A.
