Re: Nine Mile Point Unit 2
Docket No. 50-410

Gentlemen:

Enclosed please find final revisions to the following documents:

- Preservice Inspection Plan for Nuclear Piping Systems and the Reactor Pressure Vessel
- Preservice Inspection Plan for Nuclear Piping Systems and Component Supports
- Inservice Testing Plan for Pumps and Valves

These revisions reflect the configuration of the plant as of October 1986. Modifications to the plant made after October 1986, e.g. MSIV replacement, were performed in accordance with the requirements of Section XI of the ASME Boiler and Pressure Vessel Code. These modifications will be reflected in the Inservice Inspection and Inservice Testing program plans.

The results of the Preservice Inspections performed to date are available on site for your review. The hot position verification of component supports will be completed during power ascension testing.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

INSERTION INSTRUCTIONS

The following instructions are for the insertion of the revised material into the Nine Mile Point Unit 2 Preservice Inspection Plan.

Remove pages, tables, and/or figures listed in the REMOVE column and replace them with the pages, tables, and/or figures listed in the INSERT column. Dashes (---) in either column indicate no action required.

Vertical bars have been placed in the margins of inserted pages and tables to indicate revision locations.
