Gentlemen:

Subject: Combined Inspection Nos. 50-220/87-12; 50-410/87-22

A special safety inspection was conducted by NRC Region I staff members on June 22-26, 1987 and June 30 - July 1, 1987. The findings of the inspection were discussed with Messers. R. Abbott and T. Roman.

The inspection of Unit 2 was a special inspection of your post-accident sampling, analysis, and monitoring systems. The inspection of Unit 1 was a review of your actions taken on the findings identified during a special post-accident sampling, analysis and monitoring system review at Unit 1. Also reviewed was a worker concern involving emergency sampling kits. Findings identified during this combined inspection are described in the enclosed inspection report.

No violations were identified. However, some improvement items in the area of post-accident sampling, analysis and monitoring were identified. You are requested to review the identified items and respond within 30 days of the date of this letter on your actions taken or planned in regard to these items.

The response requested by this letter is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL-96-511. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
