Docket No. 50-220

APPLICATION FOR AMENDMENT

TO

OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. DPR-63, hereby requests that Table 3.2.7, Reactor Coolant System Isolation Valves, of the Technical Specifications set forth in Appendix A to that License be amended. This proposed change has been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed Technical Specifications changes are set forth in Attachment A to this application. Table 3.2.7 is being proposed for amendment to increase the maximum operating (closure) time of the emergency cooling high point vent and main steam warmup isolation valves to ten (10) seconds to be consistent with the closure time of the main steam isolation valves. The emergency cooling drain line vent isolation valves are also being added to Table 3.2.7. A closure time of ten (10) seconds is specified for these valves to be consistent with the closure time of the valves identified above. In addition, Table 3.2.7 has been revised to more accurately designate the motive power of the isolation valves. Supporting information and an analysis, which demonstrate that the proposed changes do not involve a significant hazards considerations pursuant to 10CFR50.92, are included as Attachment B.
