

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

In the Matter of )  
NIAGARA MOHAWK POWER CORPORATION ) Docket No. 50-220  
(Nine Mile Point Nuclear Station Unit No. 1 )

APPLICATION FOR AMENDMENT  
TO  
OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. DPR-63, hereby requests that Table 3.2.7 of the Technical Specifications set forth in Appendix A to that License be amended. This proposed change has been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed Technical Specification change is set forth in Attachment A to this application. The proposed change will delete the Main Steam Warmup Valves. This change is consistent with our proposed modification to remove these valves. These valves are not used during plant operation, have no role in accident mitigation, are a potential leakage path from containment and require frequent maintenance.

The proposed change would not authorize any change in the type of effluents or in the authorized power level of the facility in conjunction with this application for License Amendment. Supporting information and analysis, which demonstrate that the proposed change involves no significant hazards considerations pursuant to 10CFR50.92 are included as Attachment B.
