Attn: Document Control Desk  
Washington, D.C. 20555Re: Nine Mile Point Unit 2  
Docket No. 50-410  
NPF-69

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an application for amendment to Nine Mile Point Unit 2 Operating License NPF-69. Also enclosed are the proposed changes to the Technical Specifications in Appendix A of the above mentioned license. Supporting information and analyses demonstrating that the proposed changes involve no significant hazards consideration pursuant to 10 CFR 50.92 are included as Attachment B. Pursuant to 10 CFR 170.12, a one hundred fifty dollar (\$150.00) application fee is enclosed.

The proposed Technical Specification changes contained herein represent revisions to Section 3/4.3.2, Isolation Actuation Instrumentation. Section 3/4.3.2 contains preliminary setpoints that were based on the original General Electric design specification which must now be changed following generation of actual operating data. Startup testing is complete on a portion of the Reactor Core Isolation Cooling system, and a plant specific value has been determined for Nine Mile Point Unit 2.

Pursuant to 10 CFR 50.91(b)(1), Niagara Mohawk has provided a copy of this license amendment request and the associated analysis regarding no significant hazards consideration to the appropriate state representative.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
