Re: Docket No. 50-410

Gentlemen:

Enclosed is the Power Ascension Test Program, Interim Startup Report for Nine Mile Point Unit No. 2 dated February 1988. The actual test results from the test program will be provided in the Updated Safety Analysis Report (USAR) if they differ from the design values presently contained in the FSAR. These deviations are being resolved by incorporating changes in the USAR. The verification of this report is still in progress by our Nuclear Compliance and Verification Group. Any changes resulting from their review will be incorporated into the next report.

This report is being submitted in compliance with Technical Specification 6.9.1.3, nine months following initial criticality.

Very truly yours,

Thomas E. Lempges
Vice President
Nuclear Generation
