April 5, 1988
NMP1L 0241U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

On February 5, 1988, Niagara Mohawk submitted an application for amendment to Nine Mile Point Unit 1 Operating License DPR-63. The application for amendment involved a technical specification change to revise the definition of shutdown condition-hot. After discussions with the Nuclear Regulatory Commission's Staff, we hereby withdraw the application dated February 5, 1988, and submit this application.

The proposed Technical Specification changes contained herein represent an addition to the Table of Contents, addition of exceptions to Definitions 1.1a, Shutdown Condition-Cold, and 1.1b, Shutdown Condition-Hot, and the addition of new Sections 3.7.1 and 4.7.1, Special Test Exception-Shutdown Margin Demonstrations including associated Bases. Niagara Mohawk requests that these proposed technical specification changes be considered an emergency situation as defined in 10 CFR 50.91.

Pursuant to 10 CFR 50.91(b)(1), Niagara Mohawk has provided a copy of this license amendment request and the associated analysis to the appropriate state representative.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
