Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

On March 7, 1988, Niagara Mohawk submitted an application for an amendment to the Nine Mile Point Unit 1 Technical Specifications. The proposed change addressed revision to Specifications 3.1.2 and 4.1.2, Liquid Poison System, to satisfy the control capacity requirements of 10 CFR 50.62.

Niagara Mohawk commits to perform an isotopic analysis of the enriched sodium pentaborate supplied by our vendor. This analysis will be performed by an independent laboratory. Niagara Mohawk will revise the applicable site procedures to require this independent analysis to be performed for all future purchases of enriched sodium pentaborate.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
