Docket No. 50-410

Niagara Mohawk Power Corporation
ATTN: Mr. C. V. Mangan
Senior Vice President
301 Plainfield Road
Syracuse, New York 13212

Gentlemen:

Subject: Inspection No. 50-410/88-08

Enclosed is the report of the team inspection conducted by Mr. L. S. Cheung and other NRC inspectors and representatives on April 18-22, 1988 at the Niagara Mohawk Power Corporate Office and Nine Mile Point Unit 2 plant site.

The team's findings were discussed with members of your staff at the conclusion of the inspection. The inspection reviewed your program for establishing and maintaining the qualification of electric equipment within the scope of 10 CFR 50.49. Within these areas the inspection consisted of reviews of selected procedures and environmental qualification packages, interviews with personnel, observations and a physical walkdown verification of specific electrical equipment.

Based on the results of this inspection, it appears that one area of your activities was not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. This violation has been categorized by severity level in accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions, 10 CFR Part 2, Appendix C (Enforcement Policy 1987)." You are required to respond to this letter and in preparing your response, you should follow the instructions in Appendix A.

Your cooperation with us in this matter is appreciated.

Sincerely,

ORIGINAL SIGNED BY
WILLIAM V. JOHNSTON

William V. Johnston, Acting Director
Division of Reactor Safety
