NIAGARA MOHAWK POWER CORPORATION) Docket No. 50-410
)
(Nine Mile Point Nuclear Station Unit No. 2)

APPLICATION FOR AMENDMENT
TO
OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. NPF-69, hereby requests that Sections 3/4.3.3 and 3/4.3.5 of the Technical Specifications set forth in Appendix A to that License be amended. This proposed change has been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed changes to the Technical Specifications are set forth in Attachment A to this application. Sections 3/4.3.3 and 3/4.3.5 have been proposed for amendment to reflect revised design calculations and provide plant personnel with a parameter more representative of plant design. The Technical Specifications currently specify the Condensate Storage Tank levels at which HPCS pump suction and RCIC pump suction transfer from the Condensate Storage Tanks to the suppression pool. Instead of specifying the tank level at which transfer occurs, this amendment will revise the Technical Specifications to reflect the setpoint of the pressure switch which controls suction transfer. The proposed changes would not authorize any change in the

types of effluents or in the authorized power level of the facility. Supporting information and analyses which demonstrate that the proposed changes involve no significant hazards consideration pursuant to 10 CFR 50.92 are included as Attachment B.

WHEREFORE, Applicant respectfully requests that Appendix A to Facility Operating License No. NPF-69 be amended in the form attached hereto as Attachment A.
