Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63
TAC No. 69217

Gentlemen:

Your letter of November 10, 1988, indicated that you concurred with our decision to discontinue the quarterly monitoring of the crack in the Nine Mile Point Unit 1 reactor building wall adjacent to the screenhouse wall. However, you indicated that we should monitor the reactor building wall as soon as practical after the occurrence of a seismic event. In response to this request, Niagara Mohawk intends to perform a visual inspection of the reactor building wall to determine if widening of the crack or deformation of the wall has occurred following any earthquake of sufficient magnitude to actuate the seismic monitoring instrumentation at Nine Mile Point Unit 1. This instrumentation is set to alarm at 0.01g.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

C. D. Terry
