Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63  
Tac No. 60450

Gentlemen:

Enclosed please find Revision 2 of the Nine Mile Point Unit 1 Second Ten Year Interval Inservice Testing Program. Also enclosed is revision 1 of the Exclusion/Justification Document. These documents have been revised to address the comments of the Nuclear Regulatory Commission's staff. These revisions supersede our previous submittals dated January 18, 1989 and February 9, 1989.

We are currently scheduled to begin reloading fuel on May 5, 1989. We therefore request your interim (or final) approval of the Inservice Testing Program by April 30, 1989.

As previously discussed with the staff, additional changes to the program may be identified during the implementation process, or as a result of the ongoing review of the "Nine Mile Point Unit 1 Q-List". Any changes thus identified will be submitted under separate cover as soon as possible.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

  
C. D. Terry  
Vice President  
Nuclear Engineering and Licensing

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the experimental procedures and the instruments used.

3. The third part of the document presents the results of the experiments and discusses the implications of the findings. It compares the experimental results with theoretical predictions and other studies in the field.
