Dear Mr. Burkhardt:

SUBJECT: REVISIONS TO THE OFFSITE DOSE CALCULATION MANUAL (ODCM) FOR NINE MILE POINT UNIT NUMBER 1 (TAC NOS. 66000 AND 71163)

By letters dated March 2, 1987 and August 30, 1988, Niagara Mohawk submitted revisions to the ODCM for Nine Mile Point Unit No. 1. Generic Letter 89-01, dated January 31, 1989, has established the mechanism for transferring the procedural details of a licensee's Radiological Effluent Technical Specifications (RETS) to the ODCM in fulfillment of the Commission's Policy Statement on Technical Specification Improvements (TSIP). Future changes to these details would then be handled in accordance with the Generic Letter and would not involve a Technical Specification amendment request or a technical review by the staff.

In view of this option and in the spirit of the Commission's TSIP, we are suspending work on TAC Nos. 66000 and 71163. We encourage you to submit a proposed Technical Specification change in accordance with Generic Letter 89-01. It is our understanding that you intend to submit such an amendment application in the Fall of 1989. By this letter, we consider all action on TAC Nos. 66000 and 71163 to be complete.

Sincerely,

ORIGINAL SIGNED BY

Marylee M. Slosson, Project Manager
Project Directorate I-1
Division of Reactor Projects I/II
