NMP2L 1218U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555Re: Nine Mile Point Unit 2  
Docket No. 50-410  
NPF-69

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an Application for Amendment to Nine Mile Point Unit 2 Operating License NPF-69. Also enclosed are the proposed changes to the Technical Specifications and accompanying Bases in Appendix A of the above mentioned license. Supporting information and analyses demonstrating that the proposed changes involve no significant hazards consideration pursuant to 10 CFR 50.92 are included in Attachment B.

The proposed Technical Specification change contained herein represents a revision to Section 2.1 Safety Limits, the associated Bases and Section 3/4 4.1 Recirculation System.

This change increases the Safety Limit Minimum Critical Power Ratio (MCPR) to be consistent with that approved by the Commission as applicable to General Electric initial core fuel bundles reused in cycle 2. The new Safety Limit MCPR is also applicable to the GE 8X8NB fuel that will be used in the first reload (cycle 2) at Nine Mile Point Unit 2.

Pursuant to 10 CFR 50.91(b)(1), Niagara Mohawk has provided a copy of this License Amendment Request and the associated analysis regarding no significant hazards consideration to the appropriate state representative.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
