Gentlemen:

Subject: Combined Inspection Report Nos. 50-220/89-34; 50-410/89-23

This refers to the routine safety inspection conducted by Mr. J. Furia of this office on December 11-15, 1989, of activities authorized by NRC License Nos. DPR-63 and NPF-33, and to the discussion of our findings held by Mr. J. Furia with Mr. K. Dahlberg, Mr. R. Abbott and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection included radioactive liquid and gaseous effluents monitoring and radiological environmental monitoring programs, and are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, no violations or deviations were noted, however, as discussed in Section 3 of the enclosed report, inadequate management attention appears to be focused on the timely resolution of problems with the radiological effluent monitors of both Nine Mile Point Units 1 and 2.

Your cooperation with us in this matter is appreciated.

Sincerely,

U.S. Govt. Signed By:
Ronald R. Bellamy
