Executive Vice President
Nuclear Operations

Gentlemen:

Subject: NRC Region I Combined Inspection Report Nos. 50-220/89-30 and
50-410/89-19

This letter transmits the results of the routine inspection conducted by Messrs. W. Cook, R. Laura, R. Temps and others of this office on October 19, 1989 through December 13, 1989, at Nine Mile Point Units 1 and 2, Scriba, New York. A summary of the findings was presented to Mr. J. Willis and other members of your staff at the conclusion of the inspection.

Following review by my staff, we have issued a Notice of Violation for the Independent Assessment Team inspection finding concerning the inadequate vibration monitoring of the reactor building closed loop cooling pumps. This violation was categorized as Severity Level IV according to 10 CFR Part 2, Appendix C (Enforcement Policy). Because you have taken prompt corrective action and the resident inspectors have reviewed those actions and found them satisfactory, no response to this violation is required.

We appreciate your cooperation.

Sincerely,

*Original Signed By:
