Re: Nine Mile Point Unit #1
Docket No. 50-220
DPR-63

Gentlemen:

In conformance with the Nine Mile Point Nuclear Station Unit #1 Technical Specifications, we are enclosing the Semi-Annual Radioactive Effluent Release Report for the period July 1, 1989, through December 31, 1989. Included in this report is (a) a summary of liquid, gaseous and solid effluents released from the station during the reporting period (Tables 1-3), (b) a reference to hourly meteorological data collected for the year 1989 (Table 4), (c) a reference to the Off-site Dose Calculation Manual and Process Control Program (Table 5 and 6), (d) an explanation of the current inoperability status of effluent instrumentation (Table 7) and NMP-1 Stack Monitoring Systems (Attachment 1), and (e) a summary and assessment of radiation doses from liquid and gaseous effluents to members of the public, both inside and outside the site boundary (Attachments 2 and 3).

The format used for the effluent data is outlined in Appendix B of Regulatory Guide 1.21, Revision 1. Dose assessments were made in accordance with the NMP-1 Off-Site Dose Calculation Manual and demonstrated site compliance with 40CFR Part 190 limitations. Distribution is in accordance with Regulatory Guide 10.1, 10CFR50.4 (b)(1) and the Technical Specifications.

If you have any questions concerning the attached report, please contact Gary Corell, Chemistry Unit Supervisor, at Nine Mile Point Unit 1 (315) 349-2070.

Very truly yours,

J. L. Willis
General Superintendent
