Re: Nine Mile Point Unit #2
Docket No. 50-410
NPF-69

Gentlemen:

In conformance with the Nine Mile Point Nuclear Station Unit #2 Technical Specifications, we are enclosing the Semi-Annual Radioactive Effluent Release Report for the period July 1, 1989, through December 31, 1989. Included in this report is a summary of liquid, gaseous and solid effluents released from the station during the reporting period (Tables 1-3), a description of and justification for recent changes to the Offsite Dose Calculation Manual (ODCM) and Process Control Program (PCP) (Tables 4 and 5), a listing of inoperabilities of radioactive gaseous and liquid effluent monitoring instrumentation (Table 6) and a reference to hourly meteorological data collected for the year 1989 (Table 7). Attachment 1 is the applicable revision of the PCP for this period. Attachments 2 and 3 provide a summary and assessment of radiation doses from liquid and gaseous effluents to members of the public, both inside and outside the site boundary.

The format used for the effluent data is outlined in Appendix B of Regulatory Guide 1.21, Revision 1. Dose assessments were made in accordance with the NMP-2 Offsite Dose Calculation Manual. Distribution is in accordance with Regulatory Guide 10.1, 10CFR50.4(b)(1) and the Technical Specifications.

If you have any questions concerning the attached report, please contact Timothy M. Kurtz, Chemistry Unit Supervisor, at Nine Mile Point Unit 2, (315) 349-2615.

Very truly yours,

J. L. Willis
General Superintendent
