08 MAR 1990

Niagara Mohawk Power Corporation
ATTN: Mr. Lawrence Burkhardt, III
Executive Vice President
Nuclear Operations
301 Plainfield Road
Syracuse, New York 13212

Gentlemen:

Subject: NRC Region I Combined Inspection Report Nos. 50-220/89-33 and
50-410/89-22

This letter transmits the results of the routine inspection conducted by Messrs. W. Cook, R. Laura, R. Temps and others of this office on December 14, 1989 through January 31, 1990, at Nine Mile Point Units 1 and 2, Scriba, New York. A summary of the findings was presented to Messrs. R. Abbott, K. Dahlberg and other members of your staff at the conclusion of the inspection.

The inspectors have identified two violations at Unit 1. One involves the failure to environmentally qualify a three wire V-type splice and the second involves the failure to properly control components and systems. Both violations have been categorized as Severity Level IV according to 10 CFR Part 2, Appendix C (Enforcement Policy).

The events surrounding the second violation represent shortcomings not only in obtaining Nuclear Generation goals of improved standards of performance, but also in self assessment. In response to this violation you are requested to address these broader issues.

We appreciate your cooperation.

Sincerely,

James C. Linville, Chief
Reactor Projects Branch No. 1
Division of Reactor Projects
