Gentlemen:

Subject: NRC Region I Combined Inspection Report Nos. 50-220/90-02 and
50-410/90-02

This letter transmits the results of the routine inspection conducted by Messrs. W. Cook, R. Laura and R. Temps of this office on February 1 through February 28, 1990, at Nine Mile Point Units 1 and 2, Scriba, New York. A summary of the findings was presented to Messrs. R. Abbott, K. Dahlberg and other members of your staff at the conclusion of the inspection.

We remain concerned with the slow progress in reducing the excessive number of lit annunciators in the Unit 2 control room. This was identified as a potential safety concern in early 1988 and further discussed in the 1988 SALP report. It appears that little management attention has been given to this concern, although we acknowledge the formation of a task force in early 1990 to address this issue.

In addition, we noted mixed results regarding your progress in demonstrating better problem solving and higher standards of performance, two of the underlying root causes (URCs) in your Restart Action Plan.

We appreciate your cooperation.

Sincerely,
