Re: Nine Mile Point Unit 2
Docket No. 50-410
NPF-69

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an Application for Amendment to Nine Mile Point Unit 2 Operating License NPF-69. The proposed change to the license is provided in Attachment A. The supporting information and analyses demonstrating that the proposed change does not involve a significant hazards consideration pursuant to 10 CFR 50.92 is included in Attachment B.

The proposed license change involves the deletion of license condition 2.C(9). This license condition addresses the Detailed Control Room Design Review and the associated human engineering discrepancies.

This change will allow the processing of changes to Nine Mile Point Unit 2, Human Engineering Discrepancies (HEDs) in accordance with 10 CFR 50.59 as opposed to 10 CFR 50.90, 50.91 and 50.92. It is the intent of Niagara Mohawk to resolve all HED's identified in license condition 2.C(9) consistent with the schedules identified in the license condition. The purpose of requesting this license amendment is to avoid the processing of multiple revisions to license condition 2.C(9) as a result of future deviations to HED's.

This license amendment is needed to support the restart of Nine Mile Point Unit 2 following the 1990 refueling outage. In order to allow adequate time to develop an alternate approach, if needed, Niagara Mohawk requests that it be notified no later than August 1, 1990 regarding the acceptability of this license amendment.

During a January 12, 1990 conference call, several deviations to the HED's identified in license condition 2.C(9) were discussed with the Nuclear Regulatory Commission's Project Manager for Nine Mile Point Unit 2. As a result of this discussion, Niagara Mohawk Power Corporation will provide the revisions to the HED's to the Nuclear Regulatory Commission in a Supplement to the Detailed Control Room Design Report. This Supplement will be provided to the Nuclear Regulatory Commission within 6 months following the restart of Nine Mile Point Unit 2 from the 1990 refueling outage.

Pursuant to 10 CFR 50.91(b)(1), Niagara Mohawk has provided a copy of this License Amendment Request and the associated analysis regarding no significant hazards consideration to the appropriate state representative.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
