

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

In the Matter of )  
NIAGARA MOHAWK POWER CORPORATION )  
(Nine Mile Point Nuclear Station Unit No. 2 )

Docket No. 50-410

APPLICATION FOR AMENDMENT

TO

OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. NPF-69, hereby requests deletion of license condition 2.C(9) as set forth in the license to be amended. The proposed change has been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed changes to the license are set forth in Attachment A to this application. License condition 2.C(9) is deleted from the license. This license condition addresses the Detailed Control Room Design Review and the associated Human Engineering Discrepancies (HED's). The deletion of this license condition will allow the processing of changes to HED's in accordance with 10 CFR 50.59 as opposed to 10 CFR 50.90, 50.91 and 50.92.

The proposed changes would not authorize any change in the types of effluent or in the authorized power level of the facility. Supporting information and analyses which demonstrate that the proposed change involves no significant hazards consideration pursuant to 10 CFR 50.92 are included in Attachment B. The purpose of requesting this license amendment is to avoid the processing of multiple revisions to license condition 2.C(9) as a result of future deviations to HED's.

WHEREFORE, applicant respectfully requests that the Facility Operating License No. NPF-69 be amended in the form attached hereto as Attachment A.

NIAGARA MOHAWK POWER CORPORATION
