Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an Application for an Amendment to Nine Mile Point Unit 1 Operating License DPR-63. Also enclosed are the proposed changes to the Technical Specifications set forth in Appendix A to the above mentioned license. Supporting information and analyses demonstrating that the proposed changes involve no significant hazards consideration pursuant to 10 CFR 50.92 are included as Attachment B.

The proposed Technical Specification changes contained herein represent Revisions to Sections 6.1, "Responsibility"; 6.2, "Organization"; 6.4, "Training"; 6.5, "Review and Audit"; 6.6 "Reportable Occurrence Action"; 6.7, "Safety Limit Violation"; 6.8, "Procedures" and 6.12 "High Radiation Areas". The proposed changes are administrative in nature and are intended to provide consistency with NUREG-0123, "Standard Technical Specifications for General Electric Boiling Water Reactors" and to reflect management changes due to the reorganization of Niagara Mohawk's Nuclear Division.

Niagara Mohawk requests a Temporary Waiver of Compliance from the Administrative Controls sections of the Nine Mile Point Unit 1 Technical Specifications noted above, to facilitate implementation of the proposed changes contained herein. Niagara Mohawk requests approval of the Temporary Waiver of Compliance by October 1, 1990, to allow implementation of the new organization on that date. The Temporary Waiver of Compliance will be required until the staff acts upon our Application for Amendment. Since reorganization planning and implementation would have adversely affected the activities and resources involved in the Nine Mile Point Unit 1 outage and restart, Niagara Mohawk did not submit this License Amendment Application earlier and is, therefore, now requesting a Temporary Waiver of Compliance. In addition, Niagara Mohawk desires to implement the new organization during Mr. Lawrence Burkhardt III's tenure as Executive Vice President - Nuclear, which ends in November.

The proposed changes are administrative in nature and have no safety or environmental significance. The basis for concluding that this request does not involve a significant hazards consideration is included as Attachment B of our application. Niagara Mohawk does not intend to implement any specific compensatory actions as a result of the reorganization of the Nuclear Division.

Pursuant to 10CFR50.91(b)(1), Niagara Mohawk has provided a copy of this license amendment request and the associated analyses regarding no significant hazards consideration to the appropriate state representative.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

C. D. Terry
Vice President
Nuclear Engineering and Licensing
