Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

On September 20, 1991, Niagara Mohawk submitted an Application for Amendment to the Nine Mile Point Unit 1 Operating License DPR-63. This application contained proposed revisions to Technical Specification Sections 3.1.4/4.1.4, 3.3.2/4.3.2 and 3.3.7/4.3.7 and associated bases to allow operation at 81 °F lake water temperature and to provide consistency with the Mark I containment program.

As requested by Staff, attached are revised Technical Specification pages 129, 134 and 162 which replace these pages contained in our September 20, 1991 Application. The revised pages correct typographical errors which occurred during retyping of these pages for our Application. Pages 130, 163 and supporting information (Attachment B) also contained typographical errors and are included with the above revised pages. We apologize for any inconvenience these errors may have caused.

Very truly yours,

B. Ralph Sylvia
Exec. Vice President-Nuclear
