Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an Application for Amendment to Nine Mile Point Unit 1 Operating License DPR-63. Also enclosed are the proposed changes to the Technical Specifications set forth in Appendix A to the above mentioned license. Supporting information and analyses demonstrating that the proposed changes involve no significant hazards consideration pursuant to 10CFR50.92 are included as Attachment B.

The proposed Technical Specification changes contained herein represent revisions to the Table of Contents, Section 3.6.12/4.6.12, "Reactor Protection System Motor Generator Set Monitoring", and associated Bases. The changes represent revised nomenclature, since Motor Generator Sets 162 and 172 are being replaced by Static Uninterruptible Power Supplies during the next scheduled refueling outage. In addition, a minor editorial change has been made for consistency. This amendment is required at the beginning of the 1993 refueling outage which is currently scheduled for January.

Pursuant to 10CFR50.91(b)(1), Niagara Mohawk has provided a copy of this license amendment request and the associated analyses regarding no significant hazards consideration to the appropriate state representative.

Very truly yours,

B. Ralph Sylvia
Exec. Vice President-Nuclear
