)
Niagara Mohawk Power Corporation) Docket No. 50-220
)
(Nine Mile Point Nuclear Station Unit No. 1))

APPLICATION FOR AMENDMENT
TO
OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. DPR-63, hereby requests that Section 3.6.12/4.6.12 and associated Bases as set forth in Appendix A to that License be amended. The proposed change has been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed change to the Technical Specifications is set forth in Attachment A to this application. The Technical Specification changes are being proposed since current Motor Generator Sets 162 and 172 are being replaced by Static Uninterruptible Power Supplies (UPS). This change is a nomenclature change only. The functions provided by the UPS are identical to that of the MG sets, however, reliability is increased. In addition, a minor editorial change has been made for consistency.

The proposed change would not authorize any change in the types of effluents or in the authorized power level of the facility. Supporting information and an analysis which demonstrates that the proposed change involves no significant hazards consideration pursuant to 10CFR50.92 are included as Attachment B.

Wherefore, Applicant respectfully requests that Appendix A to Facility Operating License No. DPR-63 be amended in the form attached hereto as Attachment A.
