Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an Application for Amendment to Nine Mile Point Unit 1 Operating License DPR-63. Also enclosed are the proposed changes to the Technical Specifications set forth in Appendix A of the above referenced license. Supporting information and analysis demonstrating that the proposed changes do not involve a significant hazards consideration pursuant to 10 CFR § 50.92 are included in Attachment B.

The proposed changes are to Technical Specification Section 1.0, "Definitions," Figure 2.1.1 and its corresponding Bases, Section 2.1.2, "Fuel Cladding Integrity," and its corresponding Bases, Section 2.2.2, "Reactor Coolant System," and its corresponding Bases, Sections 3.1.7 and 4.1.7, "Fuel Rods," Sections 3.6.2 and 4.6.2, "Protective Instrumentation," Table 3.6.2a, "Instrumentation that Initiates Scram," Table 3.6.2g, "Instrumentation that Initiates Control Rod Withdrawal Block," and Section 6.9.1f, "Core Operating Limits Report." The requested changes are an integral part of the Unit 1 process computer upgrade to be implemented during Reload 13. The "3D Monicore" software supplied as a part of that upgrade utilizes the changes proposed in this amendment application. Therefore, to allow full utilization of the upgraded computer software, Niagara Mohawk requests an expeditious review of the proposed changes and issuance prior to startup from 13th Refueling, currently scheduled for March of 1993.
