Docket Nos. 50-220  
50-410

Mr. B. Ralph Sylvia  
Executive Vice President - Nuclear  
Niagara Mohawk Power Corporation  
301 Plainfield Road  
Syracuse, New York 13212

Dear Mr. Sylvia:

SUBJECT: COMBINED INSPECTION REPORT NOS. 50-220/92-26 AND 50-410/92-30

This letter transmits the NRC Region I inspection report for the engineering and technical support inspection conducted by Mr. R. Mathew of this office on October 19 through October 29, 1992, at Nine Mile Point Units 1 and 2, and the Niagara Mohawk Salina Meadows Office in Syracuse, New York. Mr. Mathew discussed the findings of the inspection with Messrs. A. DeGracia, J. Conway, K. Sweet, and other members of your staff at the conclusion of the inspection.

This inspection was directed toward areas important to public health and safety. Areas examined during this inspection are described in the NRC Region I inspection report, which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

Based on the results of this inspection, the engineering and technical support activities appeared to be effective and of good quality. However, one item pertaining to the seismic review for a simple design change remained unresolved. We also noted that the backlog of Deviation/Event Reports remained high and in need of continued management attention.
