Gentlemen:

Subject: Combined Inspection Report Nos. 50-220/91-05; 50-410/91-05

This letter refers to the routine safety inspection conducted by Dr. J. Jang and Ms. L. Peluso of this office on February 11-15, 1991, of activities authorized by NRC License Nos. DPR-63 and NPF-69, and to the discussion of our findings held by Ms. L. Peluso and Dr. J. Jang with Mr. S. Wilczek and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection included the radioactive liquid and gaseous effluent monitoring and radiological environmental monitoring programs, and are described in the NRC Region I Inspection Report, which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, no violations were noted. The recent management commitment initiatives to improve the operability of liquid and gaseous effluent monitors were identified as noteworthy and should be continued.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,
Original Signed By:
