Docket Nos. 50-220
50-410

Niagara Mohawk Power Corporation
ATTN: Mr. B. Ralph Sylvia
Executive Vice President
Nuclear Operations
301 Plainfield Road
Syracuse, New York 13212

Gentlemen:

Subject: Inspection Report Nos. 50-220/91-07 & 50-410/91-07

This refers to the routine safety inspection conducted by R. A. McBrearty of this office on March 4-8, 1991, of inservice inspection activities at Nine Mile Point Units 1 & 2 and to the discussions of our findings held by P. A. McBrearty with members of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, no violations were observed. The licensee's ISI program was found to be implemented in compliance with applicable ASME Code and regulatory requirements. In reference to the unresolved item regarding the Unit 2 ISI program, we request that NRC Region I be advised when your identified changes to optimize the Unit 2 ISI program have been implemented.

Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
Marvin W. Hodges

Marvin W. Hodges, Director
Division of Reactor Safety

Enclosure: As stated
