Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63  
TAC No. M83065

Gentlemen:

The purpose of this letter is to withdraw our request for a priority Technical Specification amendment transmitted to you March 31, 1992 (letter NMP1L 0656) and subsequently supplemented on May 13, 1992 (letter NMP1L 0666). Such an amendment would have allowed operation of potentially uncoupled Control Rod 22-31 for the remainder of Cycle 10.

The current unplanned Unit 1 outage associated with repairs to the Emergency Condenser System provided us with an earlier than scheduled opportunity for replacing Control Rod 22-31 (drive and blade).

As a result, further processing of this amendment request is no longer necessary. Nevertheless, we sincerely appreciate the timely assistance you have provided.

If you should have any further questions regarding this matter, please feel free to contact my office.

Very truly yours,

B. Ralph Sylvia  
Exec. Vice President-Nuclear
