Docket No. 50-220

Niagara Mohawk Power Corporation
ATTN: Mr. Philip D. Raymond
Vice President - Engineering
300 Erie Boulevard West
Syracuse, New York 13202

Gentlemen:

The Commission has issued the enclosed Facility Operating License No. DPR-63 to operate the Nine Mile Point Nuclear Station Unit No. 1 at steady state reactor core power levels not in excess of 1850 megawatts (thermal) in accordance with the provisions of the license and the Technical Specifications. This action is in response to your application for a full-term operating license notarized June 27, 1972.

The Nine Mile Point Nuclear Station Unit No. 1 has operated since August 22, 1969 under Provisional Operating License No. DPR-17. Facility Operating License No. DPR-63 supersedes Provisional Operating License No. DPR-17 in its entirety.

The radiological portion of the Technical Specifications, identified as Appendix A, were issued with Provisional Operating License No. DPR-17 and are being reissued in their entirety to incorporate all the applicable changes through Change No. 13. In addition, changes have been included in the reissued Technical Specifications, Appendix A, that correspond with those requested by applications for amendments to your license notarized September 20, and November 18, 1974. The environmental portion of the Technical Specifications, identified as Appendix B, are being issued for the first time and together with Appendix A constitute the complete Technical Specifications. The numbering system for amendments to the license and changes to the Technical Specifications for this newly issued Facility Operating License No. DPR-63 will begin with number 1.
