SELECTION CRITERIA FOR REACTOR OPERATOR CANDIDATES

Approved: *Robert [unclear]*
FOR INFORMATION ONLY

1.0 DISCUSSION

Reactor Operator training is a demanding process that requires dedication and hard work. Personnel selected for licensed operator training should be some of Niagara Mohawk's best personnel. The responsibilities entrusted to a Reactor Operator are unequalled anywhere in the company, which necessitates a careful selection process.

2.0 POLICY

Candidate selection for Reactor Operator License Class will be based on a combination of the following:

- Seniority
- Satisfactory completion of NLOT training program
- Satisfactory job performance
- SSS endorsement
- Satisfactory interview by Operations Management
- Training Department Screening for NRC licensing requirements and ability to license
