Verbal Marcia/José Ibarra Question #1 of 9/10/91 AM
 Q. - % of annunciators lost if UPS 1A or 1B are lost.

Response via Bob Crandall system eng. & Phil Jukes design eng. — Either UPS 1A or 1B loss would cause, loss of 100% annunciation (NSR) as happened during the event.

A.J. Quint 9/10 11:57 AM.

P.S This info also transmitted verbally by telephone message to Mr. Ibarra 12:45 PM on 9/10/91 A.J.P.

Sent SEP 10 P.M. A. PINTER

Q. 2. Does the TSC and EOF have SPDS links? What other direct computer systems go to the TSC and EOF? What was the mechanism of communication of technical data to these facilities during the T period the UPS were down?

Response TERMINALS IN TSC.

- 1) Three ERF terminals, one can display SPDS
- 2) One GEMS (Gaseous Effluent Monitoring System)
- 3) One DRMS (Digital Radiation Monitoring System)
- 4) One Meteorological Computer terminal
- 5) ① Dose Assessment Model terminal

Terminals in EOF

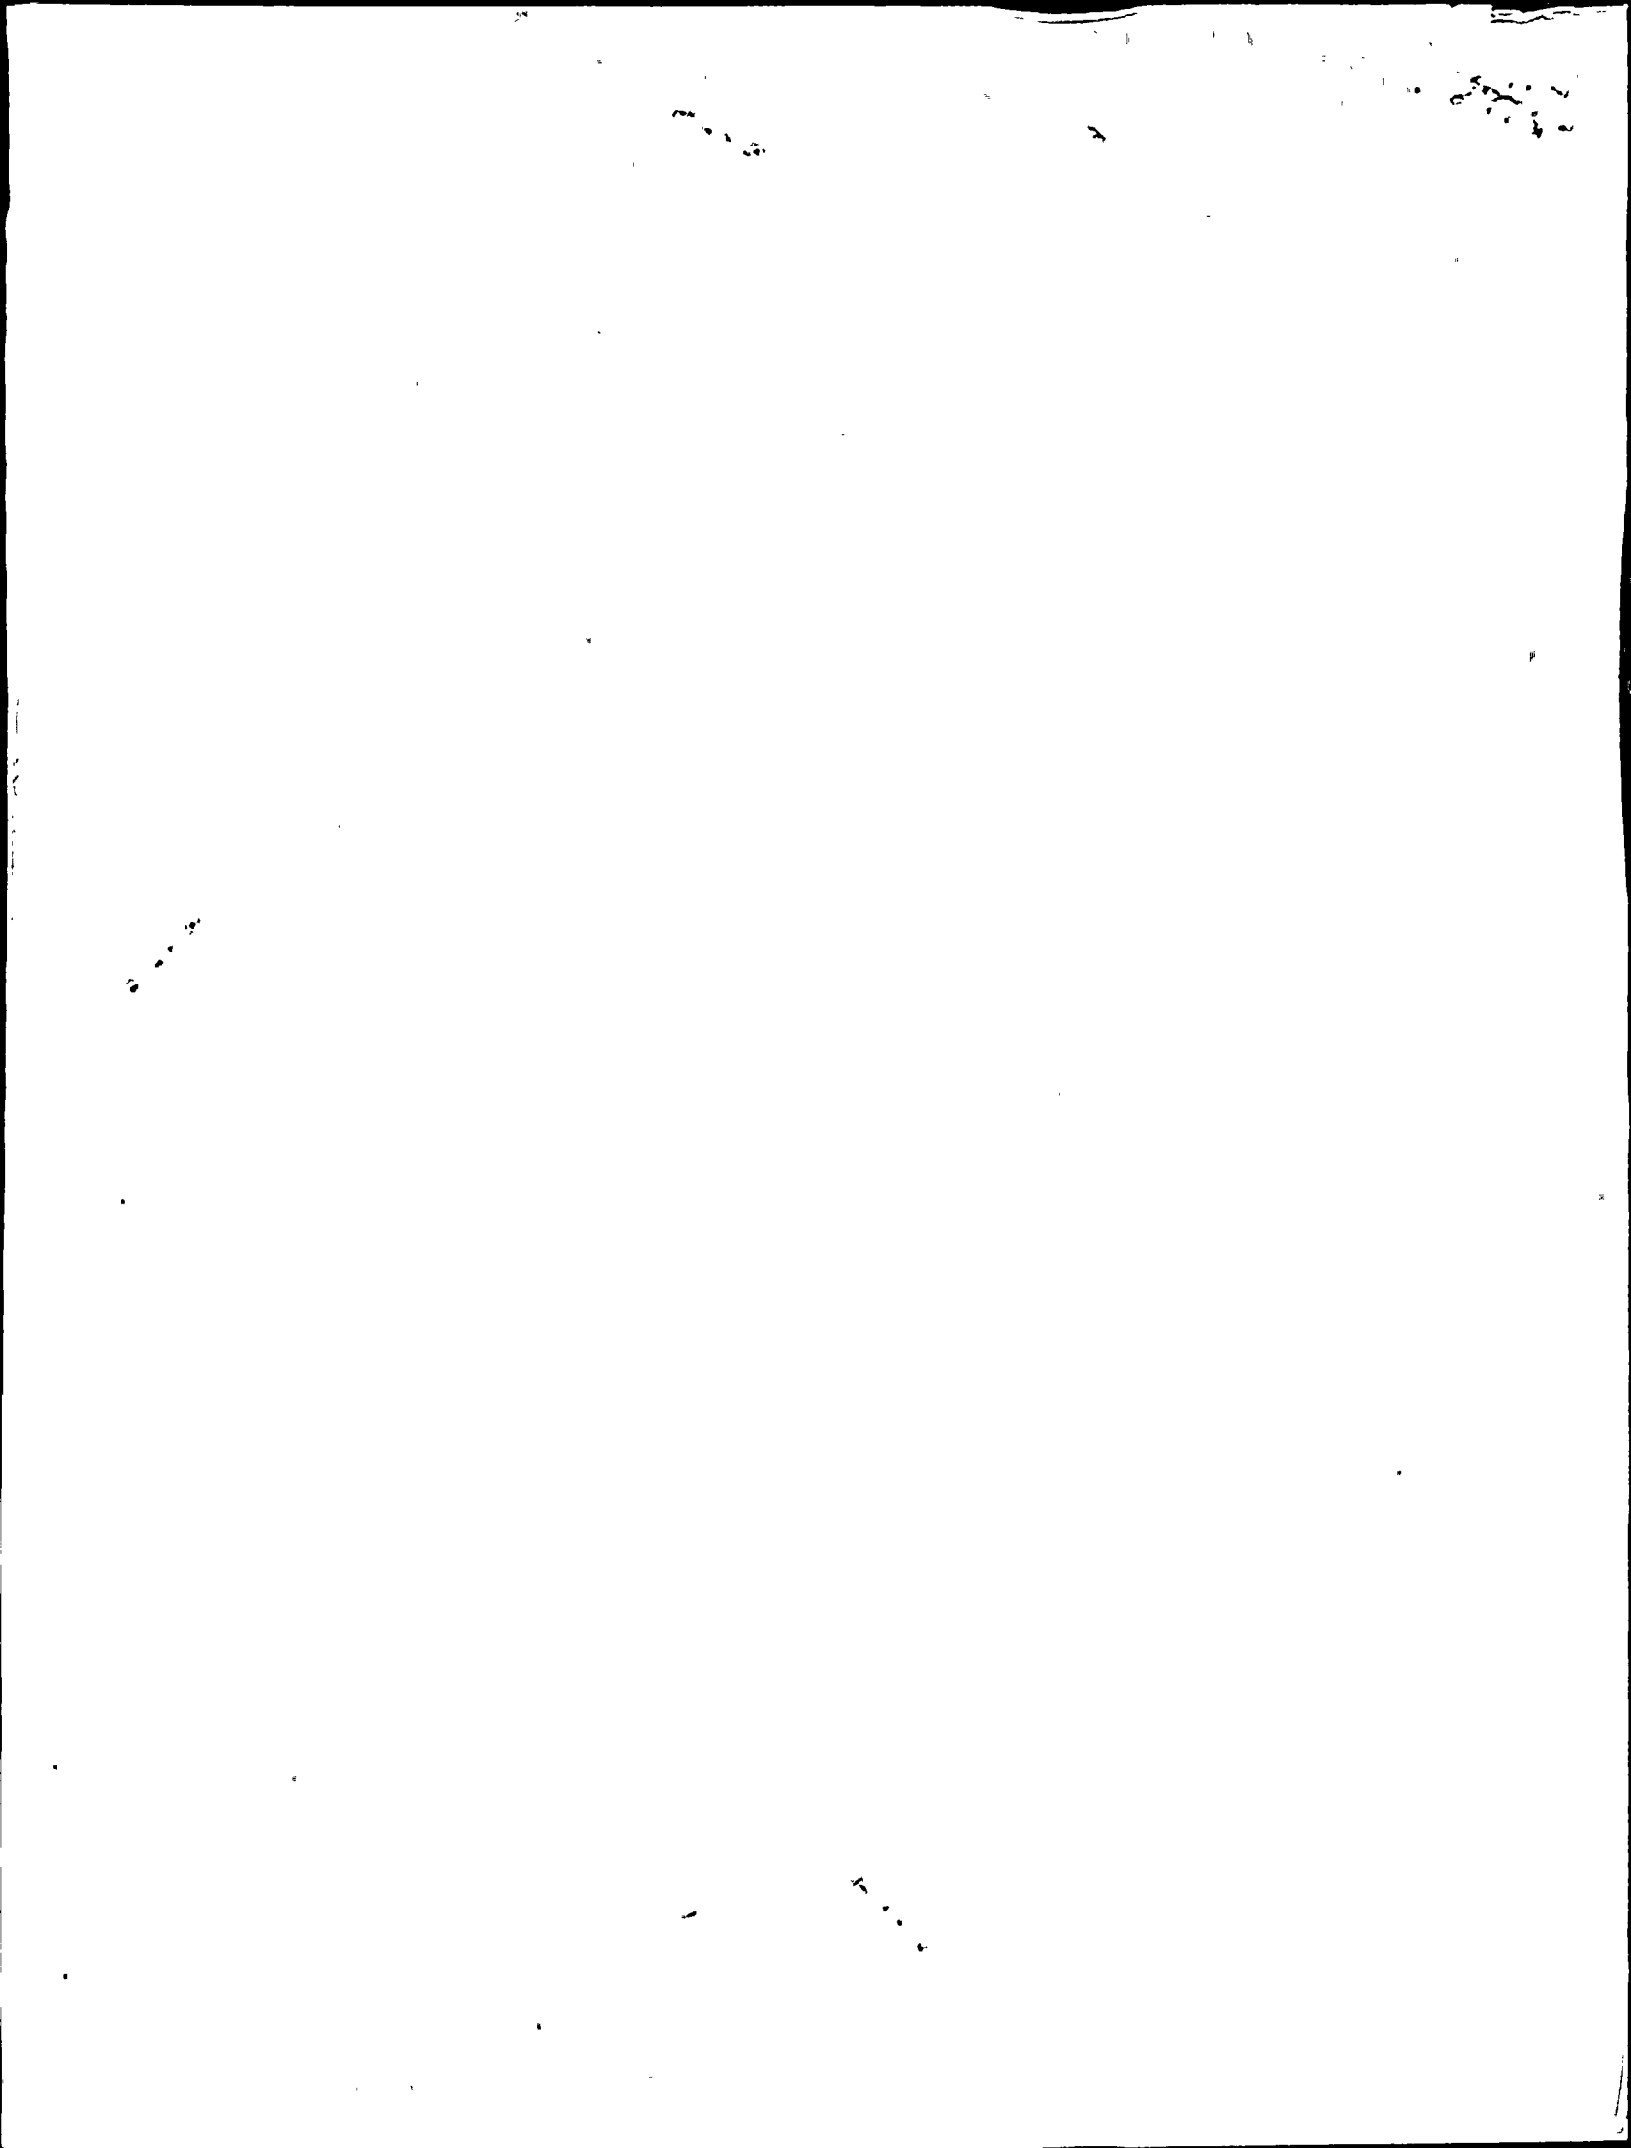

- 1) One ERF (Emergency Response Facility) can display SPDS
- 2) One GEMS
- 3) One DRMS
- 4) One Meteorological Computer.

Sent. → SEP 10 P.M. A. PINTER

Communication was provided by Gastronics, hard-wired telephone, and remote-controlled video camera in Control Room. (TSC was not stationed until 40 minutes after the event.)

This information was provided by MR. DON KENT of our syst. ENG / COMPUTER GRP. This info was also verbally transmitted to them on 9/10/91.
