COMMENTS:

I agree with Commissioner Rogers' vote on this matter. I approve staff's plan to develop a maintenance rule modified to reflect a November 1, 1988, date for submission of the proposed rule to the Commission, and an August 1, 1989, date for submission of the final package to the Commission.

This slip from our earlier date for the proposed rule of August 1, 1988, is unfortunante, but I recognize we have asked for a lot in a relatively short period of time. The EDO should manage this rulemaking effort carefully to ensure no further delays are requested.

Finally, I note on the top of page 2 of the paper the phrase "however, specific requirements may vary commensurate with their safety significance." I do not agree that this meets the intent of the "one standard approach" to maintenance expressed in our Policy, and therefore this concept does not fall within the framework of the Policy Statement.
