Docket No. 50-220  
DPR-63**Subject: SPECIAL REPORT**

Gentlemen:

In accordance with Nine Mile Point Unit 1 (NMP1) Technical Specification Table 3.6.11-1, "Accident Monitoring Instrumentation," Action Statement 4.a, Niagara Mohawk Power Corporation is submitting the following Special Report concerning the inoperability of the #11 Containment Hydrogen Monitoring Unit (HMS).

**DESCRIPTION OF EVENT**

On June 22, 1993, at 0825 hours, with the reactor mode switch in the "RUN" position and the plant operating at approximately 100% rated thermal power, the #11 HMS unit was taken out of service to perform maintenance on its associated #11 containment oxygen analyzer. The #11 containment oxygen analyzer is not a Technical Specification required system. Routine preventive maintenance was also scheduled to be performed on #11 HMS.

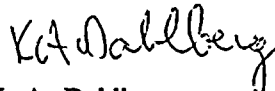

**CAUSE OF EVENT**

It is necessary to remove the #11 HMS from service to perform major maintenance on the #11 containment oxygen analyzer because the two instruments share a common power supply and sample pump.

**CORRECTIVE ACTIONS**

The #11 containment oxygen analyzer cannot be repaired because qualified parts are no longer available for this instrument. The #11 oxygen analyzer will remain out of service pending replacement. The #11 HMS will be returned to service after completion of its preventive maintenance.

Very truly yours,

K. A. Dahlberg  
Plant Manager, NMP1
