NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001  
September 29, 1993

Docket No. 50-220

Mr. B. Ralph Sylvia  
Executive Vice President, Nuclear  
Niagara Mohawk Power Corporation  
301 Plainfield Road  
Syracuse, New York 13212

Dear Mr. Sylvia:

**SUBJECT: REQUEST FOR ADDITIONAL INFORMATION REGARDING NINE MILE POINT NUCLEAR STATION UNIT NO. 1, SECOND 10-YEAR INTERVAL INSERVICE INSPECTION PROGRAM PLAN (TAC NO. M83099)**

By letter dated February 5, 1993, Niagara Mohawk Power Corporation (NMPC) responded to our request for additional information (RAI) dated December 3, 1992, regarding NMPC's Inservice Inspection Plan for the second 10-year interval for Nine Mile Point (NMP-1). The second 10-year Inservice Inspection Plan for NMP-1 had been submitted by NMPC letter dated March 30, 1992. In response D to the RAI, NMPC provided a rationale for the reclassification of the control rod drive hydraulic, high pressure coolant injection, reactor feedwater, condensate pump inlet, and shutdown cooling systems from Class 2 during the first 10-year interval to nonsafety-related during the second 10-year interval. The NRC staff is reviewing NMPC's February 5, 1993, response; however, we have determined that additional information is required for us to assess this proposed change in reclassification. Therefore, within 30 days of receipt of this letter, please provide the following to permit us to complete our review within a timely manner:

1. An estimate of the change in reliability of the subject systems.
2. Other actions to assure reliability of the subject systems.
3. An estimate of the change in risk associated with the reclassification of the subject systems.
