RE: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an Application for Amendment to Nine Mile Point Unit 1 Operating License DPR-63. Also enclosed are the proposed changes to the Technical Specifications set forth in Appendix A of the above mentioned license. Supporting information and analyses demonstrating that the proposed changes involve no significant hazards consideration pursuant to 10 CFR 50.92 are included as Attachment B.

The proposed Technical Specification changes contained herein represent a relocation of Tables 3.2.7, "Reactor Coolant Isolation Valves," and 3.3.4, "Primary Containment Isolation Valves," from Sections 3.2.7/4.2.7 and 3.3.4/4.3.4, respectively. In addition, all references to these tables have been deleted. These lists have been relocated to a procedure governing lists removed from Technical Specifications per Generic Letter 91-08, "Removal of Component Lists from Technical Specifications." The lists will also be included in the Updated Final Safety Analysis Report. Amendment No. 37 for Nine Mile Point Unit 2 is similar to this proposed amendment. Also, proposed changes to the Bases to reflect the issuance of Amendment No. 140 and remove reference to 60 second closure times for all primary containment isolation valves are included. Approval of this amendment is requested by June 30, 1994.

Pursuant to 10 CFR 50.91(b)(1), Niagara Mohawk has provided a copy of this license amendment request and the associated analyses regarding no significant hazards consideration to the appropriate state representative.

Very truly yours,

C. D. Terry
