NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

June 9, 1994

Docket No. 50-410

Mr. B. Ralph Sylvia
Executive Vice President, Nuclear
Niagara Mohawk Power Corporation
Nine Mile Point Nuclear Station
P.O. Box 63
Lycoming, New York 13093

Dear Mr. Sylvia:

SUBJECT: COMPLETION OF NINE MILE POINT NUCLEAR STATION UNIT 2 (NMP-2)
INDIVIDUAL PLANT EXAMINATION (IPE) IMPROVEMENT INITIATIVES
(TAC NO. M74437)

By letter dated May 6, 1993, Niagara Mohawk Power Corporation (NMPC) responded to our March 9, 1993, request for additional information regarding NMPC's NMP-2 IPE which had been submitted on July 30, 1992. NMPC's response to our Question General 4 stated that each of the improvement initiatives shown in Table 6.1-1 and in Section 6.2 of the IPE were planned for completion by the end of the 1993 refueling outage. Since the 1993 refueling outage has been completed and since credit was taken in the IPE for completion of these improvement initiatives, we request that within 30 days of receipt of this letter, NMPC confirm that the subject improvement initiatives have been completed or provide a justification for any delays in their completion. For any improvement initiatives that have not been completed, please provide an assessment of their delays on the core damage frequencies reported in the IPE.

Sincerely,

Donald S. Brinkman

Donald S. Brinkman, Senior Project Manager
Project Directorate I-1
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
