

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

June 9, 1994

Docket No. 50-220

Mr. B. Ralph Sylvia
Executive Vice President, Nuclear
Niagara Mohawk Power Corporation
Nine Mile Point Nuclear Station
P.O. Box 63
Lycoming, New York 13093

Dear Mr. Sylvia:

SUBJECT: NINE MILE POINT NUCLEAR STATION UNIT NO. 1 - RESPONSE TO NRC
BULLETIN 93-02, SUPPLEMENT 1, "DEBRIS PLUGGING OF EMERGENCY CORE
COOLING SUCTION STRAINERS" (TAC NO. M89299)

This letter acknowledges receipt of Niagara Mohawk Power Corporation's (NMPC's) responses dated April 18, 1994, and May 31, 1994, for Nine Mile Point Nuclear Station Unit No. 1 to NRC Bulletin 93-02, Supplement 1 (Bulletin). The Bulletin was issued February 18, 1994, for action to all Boiling Water Reactor (BWR) licensees and for information to all Pressurized Water Reactor (PWR) licensees. The purpose of the Bulletin was to inform BWR and PWR licensees about the vulnerability of ECCS suction strainers in BWRs and containment sumps in PWRs to clogging during the recirculation phase of a loss-of-coolant accident (LOCA), to request that BWR licensees take the appropriate actions to ensure reliability of the ECCS in view of the information discussed in this bulletin supplement, and to require that BWR licensees report to the NRC on the requested actions taken. The April 18, 1994, response addressed the actions NMPC was taking to assure the operability of ECCS recirculation. The May 31, 1994, response confirmed completion of the planned actions. Please retain any records of NMPC's actions in response to this Bulletin, as subsequent inspection activities may be conducted in regard to this issue.

Please contact me at (301) 504-1409 if you have any questions regarding this issue. All NRC staff activities related to TAC No. M89299 are considered complete.

Sincerely,

Donald S. Brinkman, Senior Project Manager
