RE: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Gentlemen:

By letter dated July 21, 1994 (NMP1L 0838), Niagara Mohawk submitted an Application for Amendment to the Nine Mile Point Unit 1 Operating License DPR-63. The proposed changes involved the use of Range 10 on the IRMs and an extension of the calibration frequency associated with the SRMs and IRMs. The purpose of this letter is to inform you that Niagara Mohawk wishes to withdraw that portion of the amendment associated with the extension of the calibration frequency for the SRMs and IRMs; however, we intend to pursue this at a later date. Attachment 1 to this letter provides a complete set of revised Technical Specification pages which reflect the portion of the amendment pertaining to IRM Range 10. Approval of this amendment is requested prior to the start of Refueling Outage 13, currently scheduled for February 1995, with implementation upon completion of the refueling outage.

A copy of this letter has been forwarded to the appropriate state representative.

Very truly yours,

B. Ralph Sylvia  
Executive Vice President - Nuclear
