RE: Nine Mile Point Unit 2
 Docket No. 50-410
 NPF-69

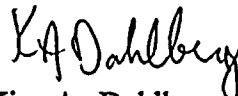

Subject: Transmittal of 1994 Annual Environmental Operating Report

Gentlemen:

In accordance with Appendix B of the Operating License (Environmental Protection Plan) for Nine Mile Point Nuclear Station Unit 2, enclosed is the Annual Environmental Operating Report for the period January 1, 1994 through December 31, 1994.

In the event you have any questions concerning the report, please contact Anthony M. Salvagno, Acting Supervisor Environmental Protection, at Nine Mile Point (315) 349-1456.

Very truly yours,

Kim A. Dahlberg
Plant Manager - Unit 2

ANNUAL ENVIRONMENTAL OPERATING REPORT

The Environmental Protection Plan (EPP), as contained in Section 5.4.1 of Appendix B of the Operating License for the Nine Mile Point Nuclear Station Unit 2, requires that an Annual Environmental Operating Report be submitted to the Commission prior to May 1 of each year. The following addresses the requirements found in Section 5.4.1 of the Environmental Protection Plan for the submittal of the Annual Environmental Operating Report:

1. Provide summaries and analyses of the results of the environmental protection activities required by Section 4.2 (if any) of the Environmental Protection Plan, including a comparison with related preoperational studies, operational controls (as appropriate), previous non-radiological environmental monitoring reports, and an assessment of the observed impacts of plant operation on the environment. If harmful effects or evidence of trends toward irreversible damage to the environment are observed, a detailed analysis of the data and a proposed course of mitigating action shall be provided.

Section 4.2 of the Environmental Protection Plan denotes three areas of monitoring:

- Section 4.2.1 (aquatic monitoring) has no specific monitoring requirements although it is noted that the Commission will rely on the decisions made by the State of New York under the authority of the Clean Water Act for any requirements. Aquatic monitoring is specified in the station's State Pollutant Discharge Elimination System Permit (SPDES Permit) which is a site permit applicable to Nine Mile Point Nuclear Station Unit 1 and Unit 2. The SPDES Permit requires a limited aquatic monitoring program (referred to as a Biological Monitoring Program) which, at the present time, is only applicable to Unit 1. Therefore, no aquatic monitoring program is presently required for Unit 2.

The results of any aquatic monitoring required by the State of New York for Unit 1 are contained in the Annual Biological Monitoring Report. The requirements for this report are specified in the SPDES Permit. A copy of the Annual Biological Monitoring Report will be submitted to the Commission under a separate letter.

- Section 4.2.2 (terrestrial monitoring) and Section 4.2.3 (noise monitoring) of the Environmental Protection Plan also do not contain any monitoring requirements.
2. Provide a list of Environmental Protection Plan noncompliances and corrective actions.

A review of the Environmental Protection Plan requirements showed that there were no conditions of noncompliance with the Environmental Protection Plan during 1994.

100-100000-100000

ANNUAL ENVIRONMENTAL OPERATING REPORT (continued)

3. Provide a list of all changes in station design or operation, or of any tests or experiments which involve a potentially significant unreviewed environmental question (non-radiological).

A review of 1994 showed that there were no changes in station design or operation nor any tests and experiments conducted that involved a potentially significant unreviewed environmental question (non-radiological).

4. List all nonroutine reports that were submitted during 1994 in accordance with Section 5.4.2 of the Environmental Protection Plan.

During 1994, there were no occasions where nonroutine reports were submitted to the Commission.
