

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

October 30, 1995

Mr. B. Ralph Sylvia  
Executive Vice President, Nuclear  
Niagara Mohawk Power Corporation  
Nine Mile Point Nuclear Station  
P.O. Box 63  
Lycoming, NY 13093

SUBJECT: NINE MILE POINT UNIT 1, REQUEST TO WITHDRAW PRESSURE/TEMPERATURE  
LIMIT CURVES AMENDMENT (TAC NO. M90288)

Dear Mr. Sylvia:

By letter dated September 1, 1994, you applied for an amendment to the Nine Mile Point Unit 1 Operating License. The proposed change would have modified the facility Technical Specification Section 3.2.2, "Minimum Reactor Vessel Temperature for Pressurization."

The Nuclear Regulatory Commission denied the amendment request by letter dated September 22, 1995, and issued a safety evaluation setting forth the basis for the denial. The Notice of Denial of Amendment to Facility Operation License and Opportunity for Hearing was published in the Federal Register on September 29, 1995 (60 Fed. Reg. 50650). By letter dated October 27, 1995, you requested, pursuant to 10 C.F.R. § 2.107, that the staff permit the withdrawal of the amendment request without prejudice to its future resubmittal.

As provided in the September 29, 1995 Federal Register notice, the opportunity for you to request a hearing expires today. Consequently, if you do not request a hearing, the NRC Staff's denial of your amendment request will become final agency action. However, since the staff's denial of your amendment request has not become final agency action because your time to request a hearing has not yet expired, the staff is granting the withdrawal of your amendment request without prejudice to its future resubmittal.
