RE:                   Nine Mile Point Unit 2  
                          Docket No. 50-410  
                          NPF-69

**Subject:**       *Notification of Corrective Action Completion for ISI Program Plan*

Gentlemen:

The purpose of this letter is to inform you that Niagara Mohawk has corrected the Nine Mile Point Unit 2 (NMP2) Inservice Inspection (ISI) program as described in corrective action three of Licensee Event Report (LER) 96-12, Supplement 1, submitted on January 17, 1997 (NMP2L 1683). Specifically, the corrective action required that the ISI Program Plan be corrected to indicate that 16 welds in the Reactor Water Cleanup (RWCU) System are considered Category D welds requiring augmented examination at least every other refueling outage.

Furthermore and as discussed in the LER, this notification corrects the error in a February 13, 1992 letter to the NRC (NMP2L 1339), in which Niagara Mohawk had incorrectly indicated that the 16 shop fabricated RWCU system welds had been reclassified as Category D in accordance with Generic Letter 88-01.

Should you have any questions regarding this matter, please contact Mr. R. Dean, the Unit 2 Engineering Manager, at 315-349-4240.

Very truly yours,

M. J. McCormick  
Vice President, Nuclear Engineering

MJM/AFZ/lmc
